Are You Aware?

- Nine out of 10 people on social media face cyber harassment
- Your child may be a victim
- Anything on Internet is no more private
- Youngsters are being stalked on social platforms for predation
- Ignorance about privacies of social platforms is common

10 Reminders for Safety

- Think before you click
- Nothing urgent is Very Important
- You are not Special,to be approached
- Believe in your intuition, if something does'nt feel right , it is not
- Take challenge from the front
- Never Panic
- Don't take the bait
- Ocuppy your spaces on social media
- Every message/situation is fraud , start thinking from negative
- Nothing is deleted permanently,its still there

Impersonation

Pretending to be someone else in order to deceive, often used in conjunction with phishing and social engineering attacks

Cyber Bullying

Cyberbullying involves sending, posting, or sharing negative, harmful, false, or mean content about someone else, often causing embarrassment or humiliation

Malware

Malicious software designed to harm or exploit devices, systems, or networks
Spam Calls

Unsolicited, fraudulent phone calls aiming to deceive individuals into providing personal information or performing certain actions

Online Predation

These individuals seek to exploit vulnerable children or adults, usually for sexual or other abusive purposes. They often use social media, chat rooms, and online forums to establish contact with potential victims

WHAT TO DO ?

EDUCATE YOURSELF:

Stay informed about the latest social engineering tactics and how to recognize and avoid them

Communicate, No One Will Judge You

Create an environment where individuals feel safe to communicate cyber threats without fear of judgment. Encourage reporting of suspicious activities to prevent potential cyberattacks
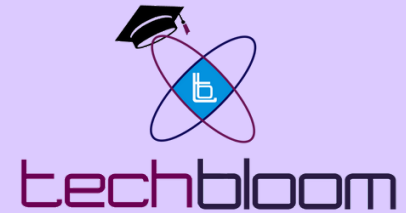

Only download Apps from Official Application Stores

Download apps only from official app stores such as the Apple App Store, Google Play Store, or Microsoft Store. Avoid third-party app stores.Review and manage the permissions granted to applications on your devices

Lock Your Devices:

Use passwords, PINs, or biometric security features (fingerprint, facial recognition) to lock your devices when not in use
